VetRx™
VETERINARY REMEDY

REMEDY FOR DOGS AND PUPS

Based on a formula in use since 1874

For treating all breeds of Dog and Pup. Effective relief of symptoms caused by upper respiratory ailments produced by congestion or allergy. When a dog loses its sense of smell due to congestion, it also loses its appetite, further weakening your pet. VetRx provides the relief needed to encourage it to take in nourishment and speed up the process of natural healing.

Symptoms to look for:

Sniffling, sneezing, nasal discharge and noisy breathing.

Dosages and Preparing Suggestions:

For best results use VetRx warm. Put bottle in a container of warm water and let it stand for a few minutes or warm quickly over medium heat with the spout in open (upright) position. Always test temperature of product before applying.

Apply 2 drops directly into each nostril for adult dogs, 1 drop for puppies. Repeat in 5 minutes. Repeat applications 3-4 times a day. If possible, isolate your pet and treat with VetRx in warm water vaporizer, following manufacturers directions.

If upper respiratory symptoms persist, consult your veterinarian.

Ear Mites:

Symptoms - Dog will shake its head and scratch at its ears.

Treatment:

- Use VetRx warm.
- Shake bottle well to help mix contents.
- Apply by the drop or with a Q-Tip swab. Be sure to dampen entire affected area. Do not dig off the scabs. The scab should eventually be shaken off by the dog.

Note:

VetRx will leave an oily film on skin and fur. This will not burn the skin or remove hair. It is helpful in destroying any mites or mite ova which may be present.

Caution:

For animal use only. Not for human consumption. Use only as directed. Keep this and all medication out of the reach of children.
