

**USE DIRECTIONS**

**CHAPPED TEATS, SCRATCHES AND BRUISES:** Apply generously after every milking. Rub in well.

**GALLS, FETTER BURNS, CRACKED HEELS AND SADDLE SORES:** Rub in well, then apply a light coating after rubbing.

To soothe and soften chapped and rough skin, massage a liberal amount of the ointment into the affected areas several times each day.

**CAUTION:** Wash the teats and udder of treated animals prior to milking.
